

Why does my canine patient need vitamins and antioxidants for his or her eyes?

Numerous canine breeds are genetically predisposed to eye diseases including retinal degeneration, cataracts, uveitis, glaucoma, dry eye, and others. Diabetic dogs are extremely susceptible to rapidly developing severe cataracts.

The most common cause of toxic cataracts in dogs is from retinal degeneration. Approximately 100 breeds have been identified with inherited retinal degenerations. These problems can appear early in life, i.e. under 2 years of age or later, in young to middle aged dogs. The retina dies slowly and elicits dialdehyde toxins into the vitreous, that then permeates the back of the lens, causing the lens cells to undergo abnormal changes and affect the opacity of the lens.

All of these patients may benefit from a supplement specifically designed to support the needs of the canine eye. Until now, this supplement did not exist. **Ocu-GLO Rx™** is a nutraceutical containing the most innovative, complete, and safe antioxidant ingredients ever formulated for dogs.

Who We Are

Animal HealthQuest is a company dedicated to creating unique, high quality nutritional supplements for animal health. Our premier nutraceutical, **Ocu-GLO Rx™** is designed to support the eye health of dogs via ingredients proven to slow the progression of numerous eye diseases.

Dr. Carmen Colitz is a board certified veterinary ophthalmologist with a PhD in molecular biology. Dr. Colitz has extensive research experience involving antioxidants and how they affect eye health, particularly the lens. In addition, Dr. Colitz discovered telomerase activity in cataracts and has had over 10 years research experience working in this field.

Dr. Terri McCalla is a board certified veterinary ophthalmologist in Bellingham, WA. Dr. McCalla's research interest is in retinal pathology, and she has been in private specialty practice for over 20 years.

Debby Smith is a registered pharmacist specializing in compounding medications and supplements for both animals and humans. She owns Ballard Plaza Pharmacy in Seattle, WA, which provides 40 years of compounding experience to their patients.

Exclusively distributed by

Ocu-GLO Rx™ is distributed exclusively through Animal Necessity. Combining more than 30 years clinical experience of Dr. Norma Pestano with cutting-edge research from some of today's leading veterinarians, Animal Necessity delivers 100% natural vitamins and supplements direct to your small animal, zoo and aquatic friends, providing increased health, happiness and longevity.

Ocu-GLO Rx™

Vision Supplement*

Formulated by Veterinary Ophthalmologists

Information for Veterinarians

www.OcuGLO.com

Is your patient showing any of these common canine eye problems?

- Decreased vision at night or in dim lighting conditions
- Diminished vision at all times
- Cloudy appearance to eyes
- Pupils that do not constrict
- Obvious cataracts

Is your patient's vision good but you want to support their healthy vision with an antioxidant supplement?

Animal HealthQuest and **Animal Necessity** are proud to introduce **Ocu-GLO Rx™**, a Canine Vision Supplement to support the eye health of dogs.

Ocu-GLO Rx™ was designed by Board-Certified Veterinary Ophthalmologists and a Compounding Pharmacist with over 75 years combined experience in veterinary health.

Ocu-GLO Rx™ contains 12 different antioxidants that work together to support the nutritional needs of your patient and your patient's eyes.

The 12 antioxidants in **Ocu-GLO Rx™** are pharmaceutical grade made under Good Manufacturing Practices (GMP) guidelines. These guidelines are as strict as the guidelines for making prescription drugs—standards that are much higher than nutritional product manufacturers are required to meet. **Ocu-GLO Rx™** gives you peace of mind that your patient's vision supplement is made from the **PUREST** and **VERY BEST INGREDIENTS**.

KEY ANTIOXIDANTS

GRAPSEED EXTRACT

- Potent antioxidant from grapeseeds
- More powerful free radical scavenger than Vitamin C and Vitamin E

LUTEIN & ZEAXANTHIN

- Carotenoid antioxidants necessary for protection of the retina and lens
- Decreases the risk and severity of certain retinal diseases and cataracts
- Proven to improve overall immune health*

OMEGA-3 FATTY ACIDS

- Essential fatty acids that cannot be synthesized in the body
- DHA, docosahexaenoic acid, an essential fatty acid that supports retinal health

(Kim, H. W., B. P. Chew, et al. (2000). Dietary lutein stimulates immune response in the canine. Vet Immunol Immunopathol 74(3-4): 315-327.)

Ocu-GLO Rx™ is a nutraceutical comprised of 12 natural antioxidants including Grapeseed Extract, Lutein, and Omega-3 Fatty Acids (GLO). Until now, these key ingredients have not been available in a combination blend that also includes Lycopene, EGCG, CoQ10, Alpha Lipoic Acid and 5 other antioxidants in a **natural, single-dose nutraceutical of the highest quality for your patient's health.**
